

CONCEPT FLYER

Project Arch

From archives to you, accelerated by AI

Project Arch is an announced concept that turns scholar research into AI-guided reading support for students.

Built for K12-14 learners, educators, and academic partners. Announced concept only.

PLATFORM SNAPSHOT

Scholar-led

Grounded in real academic voices and research

Grade-aware

Answers personalized by student reading level

Story-driven

Research transformed into engaging learning media

INITIAL SCOPE

The first scholar directory centers on Big Ten universities in the United States with grade-aware experiences for K12-14 students.

01

Veri AI

A scholar-specific chatbot delivering grade-personalized answers grounded in each scholar's research and academic voice.

02

Scholar Directory

A searchable Big Ten scholar directory built for discovery, context, and research access.

03

AI Scholar Podcasts

AI-generated scholar conversations that surface shared themes, debate, and cross-disciplinary insight.

04

Editorial and Curated Stories

AI editorials and scholar-curated stories that turn research into readable narratives for learners.

WHY IT MATTERS

Explanations, tone, and depth adjust for different grades and learning communities.

Build a new American model for reading comprehension.

Students

Get clearer answers from difficult academic material

Educators

Bring scholar-backed reading support into instruction

Partners

Explore pilots, sponsorships, and investment opportunities

WHAT IS INSIDE

Platform Features

The back page outlines the core product layers that shape the Project Arch learning experience.

- 1 A Big Ten-centered scholar directory with research profiles, background context, and discovery pathways for students.
- 2 Access to both legacy scholars and contemporary researchers across major R1 university ecosystems.
- 3 Veri AI responses grounded in scholar-specific materials rather than generic chatbot output.
- 4 Grade-personalized explanations that adapt reading level, tone, and depth for K12-14 learners.
- 5 AI-assisted reading comprehension activities built to help students work through difficult texts with confidence.
- 6 AI-generated scholar-to-scholar podcast conversations that surface overlap, tension, and interdisciplinary insight.
- 7 Recorded and live audio formats that make academic knowledge more accessible and engaging.
- 8 Editorial publishing powered by both AI generation and scholar-curated contributions.
- 9 Perspective stories and commentary that connect research to current issues, culture, and public life.
- 10 A platform model designed to support healthier comprehension, stronger writing development, and more meaningful student learning.

Next step

Private concept materials, pilot discussions, and partnership conversations are available for selected collaborators, sponsors, and investors.

Flyer note

Explanations, tone, and depth adjust for different grades and learning communities.
